PREPARED FOR CLIENT NAME DATE 26 SEP 2026 STATUS SPECIMEN

Agenda

01

SITE

What the roof and service can carry

02

SYSTEM

Solar, storage and interconnection

03

ECONOMICS

Savings, incentives and payback

04

NEXT STEPS

Decisions and schedule

01 SITE

The roof can carry about 412 kW of solar

A NEW TPO ROOF, CLEAR ARRAY ZONES AND AN EXISTING 2,000 A SERVICE.

Representative image of a comparable rooftop array.

ARRAY SIZE

412 KW DC

◆

USABLE ROOF

68,400 FT²

◆◆

SERVICE

2,000 A · 480 V

◆◆◆

01 SITE

Four figures define the opportunity

ILLUSTRATIVE FIGURES FOR THE SPECIMEN.

ILLUSTRATIVE FIGURES · SPECIMEN

◆ BOTTOM LINE

Payback in 6.4 years with the existing service.

02 SYSTEM

Built and verified by our own crews

Every cabinet is **tested, torqued**
and **logged** before handover.
One team owns the work
from design to commissioning.

02 SYSTEM

Three parts, one integrated system

EACH PART IS ENGINEERED TO THE SITE.

01

Solar array

412 kW DC on the new TPO roof, laid out around keep-outs and access paths.

02

Battery storage

Two 600 kWh cabinets shave peaks and carry critical loads.

03

Interconnection

A line-side tap on the existing 2,000 A service, subject to utility approval.

03 ECONOMICS

Savings grow each year as utility rates rise

ANNUAL BILL SAVINGS, YEARS 1-10, \$K. YEAR 10 HIGHLIGHTED.

Savings rise from
\$62K to \$104K a year.

◆ BOTTOM LINE 10-year savings of \$819K. Payback in 6.4 years.

ECONOMICS

38%

Lower grid electricity
spend from the first year

BASIS 12-MONTH INTERVAL DATA
