REVIEW

Evidence before capital release

---

01 EQUIPMENT

# Equipment sourcing requires diligence

DCFC, BESS AND INFRASTRUCTURE INVENTORY  
REMAIN SUBJECT TO TRANSACTION REVIEW.

| REVIEW AREA             | REQUIRED EVIDENCE                                                 |
|-------------------------|-------------------------------------------------------------------|
| Serials / title         | Model, title chain, location, custody and serial records          |
| Condition               | Inspection, photos, missing parts and commissioning path          |
| Warranty / support      | OEM status, serviceability and parts access                       |
| Comparable value        | Documented public references and invoices                         |
| Deployment / protection | Named site or redeployment plan; collateral, escrow and insurance |

01 DEPLOYMENT

# Project demand governs equipment fit

Title, condition and serviceability must support a named deployment or redeployment plan.

OCEAN PROJECT PHOTO: DJI\_0482

02 INCENTIVES

# Incentives require written confirmation

ELIGIBILITY, RESERVATION STATUS AND DOCUMENTATION PRECEDE CAPITAL PLANNING.

| PROGRAM LAYER    | CONFIRMATION REQUIRED                                                |
|------------------|----------------------------------------------------------------------|
| Federal          | Tax-credit eligibility, domestic content and energy-community review |
| State / utility  | Make-ready, EVSE, storage, solar or managed-charging programs        |
| Local            | Permits, grants, economic development or site programs               |
| Capital planning | Award or reservation confirmed before net-capital adjustment         |

02 UNDERWRITING

Site underwriting  
connects the evidence

PHYSICAL FEASIBILITY, COMMERCIAL DEMAND  
AND OPERATING READINESS MUST ALIGN.

Ocean project photo: DJI\_0482; no site findings inferred

SITE

Access, flood, setbacks, parking

◆

POWER

Load, utility path, tariff, switchgear

◆◆

DEMAND

Charging, fleet, tenant or compute

◆◆◆

SCOPE

Civil, electrical, equipment, timing

◆◆◆◆

03 RISK CONTROLS

# Each risk has an owner and a go/no-go threshold

| RISK CATEGORY             | CONTROL STANDARD                          |
|---------------------------|-------------------------------------------|
| Utility / interconnection | Written feasibility and cost path         |
| Permits / zoning          | Documented approval path                  |
| Equipment                 | Title, inspection and serviceability      |
| Demand                    | Contract, LOI or site-specific model      |
| Construction              | Scope, budget, schedule and lien controls |

CAPITAL CONTROLS

5

funding gates require  
documented evidence
